

## Supply of material for GoBo's

### On paper

Logo (or image) might be drawn or printed on paper. Please make it as big as possible on a4 format; the black must be well covering.

### Digital

Vectors - or line file.

Supply logo (or image) on cd-rom, zip- or floppy disk in Apple or Windows format. It has to be a file.ai, or file.eps or when made with CorelDraw a file.cdr. Adobe Illustrator EPS-file are preferred. Please transpose text (fonts) into lines, so problems with character types can be avoided.

### Bitmap- or pixel file

A bitmap file is often created in cases of scanning. Please save your scan as JPEG- or as TIFF-file (lzw-compression is possible). Save the JPEG in best quality. A golden rule for supplying a bitmap file is: Make sure that the file is twice as big as the screen size with a minimum resolution of 600 dpi (dots per inch). Notice: RGB-colour is needed.

### What we want to know?

Important:

Brand and type of moving head the Gobo will be put in. The amount of Gobo's that are needed? Do they have to be in: black and white, greyscale or colour. When and where do the Gobo's have to be delivered? Your name and address and if necessary billing name and address.

### Address

Send logo to:

Purple Group  
Huygensweg 22  
5482 TG Schijndel
